

Solution Brief

# ActionIQ Identity

# Identity

Manage and resolve identities across anonymous and known customers across first, second and third party sources of your choice, respecting privacy regulations.

## What You Get

### 360-Degree View

Combine historical and real-time data to create a unified profile for every customer.

### Agility

Stitch together first- and third-party ID graphs to avoid lock-in and adapt to a changing identity market.

### Privacy-first

Achieve your goals while respecting evolving industry and government regulations.

## How We Do It

### IdentityPlus

Tailor identity resolution using deterministic and probabilistic modeling on your known first party data.

### IdentityConnect

Resolve anonymous and known customer identities using an integration with one or multiple data and identity vendors.

### IdentityEdge

Obtain addressable signals among traffic from your digital properties and retarget in real time using integrations with demand-side platforms, walled gardens and other vendors.

“The ActionIQ CX Hub, augmented by Neustar’s identity resolution capabilities, will allow us to better understand our customers and to orchestrate superior experiences across every brand touchpoint. We are confident that this will increase our organizational intelligence and agility to drive long term revenue and growth.”

# How It Works

# IdentityPlus

Tailor identity resolution using deterministic and probabilistic modeling on your known first party data.

## What You Get

### Customer 360

Build a private ID graph and a centralized customer 360 view from your entire known profile data sets.

### Control

Define sensitivity to match records based on your data and use cases.

### Cost Savings

Remove wasted marketing spend due to duplicate user profiles in your data.

## How We Do It

### Standardization

Execute data quality processes to improve customer data match opportunities and identity resolution end result.

### Matching

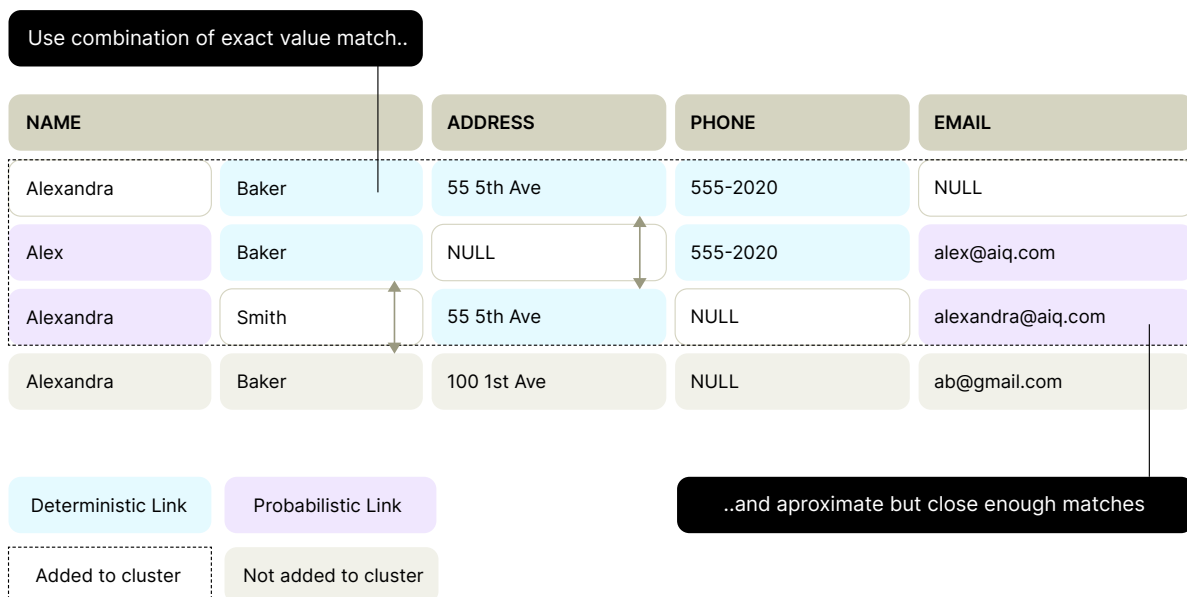

Leverage deterministic and probabilistic methods to score and match customer records. Select accuracy confidence score to confirm matches.

### Stitching

Map and stitch data back to master records across all tables.

## How It Works

# IdentityConnect

Resolve anonymous and known customer identities using an integration with one or multiple data and identity vendors.

## What You Get

### Flexibility

Adopt any ID solution available without being locked-in, adapt to a changing identity market.

### Improved Resolution

Resolve identities beyond owned customer data, using the large scale of vendor graphs.

### Data Enrichment

Expand your customer knowledge with 2nd and 3rd-party data such as demographic or firmographic data.

## How We Do It

### Partner Ecosystem

Benefit from direct partnership with leaders in the third party id graph space, inclusive of Neustar, Merkle, Merkur, Liveramp, Acxiom and Data Axle.

### ID Portfolio

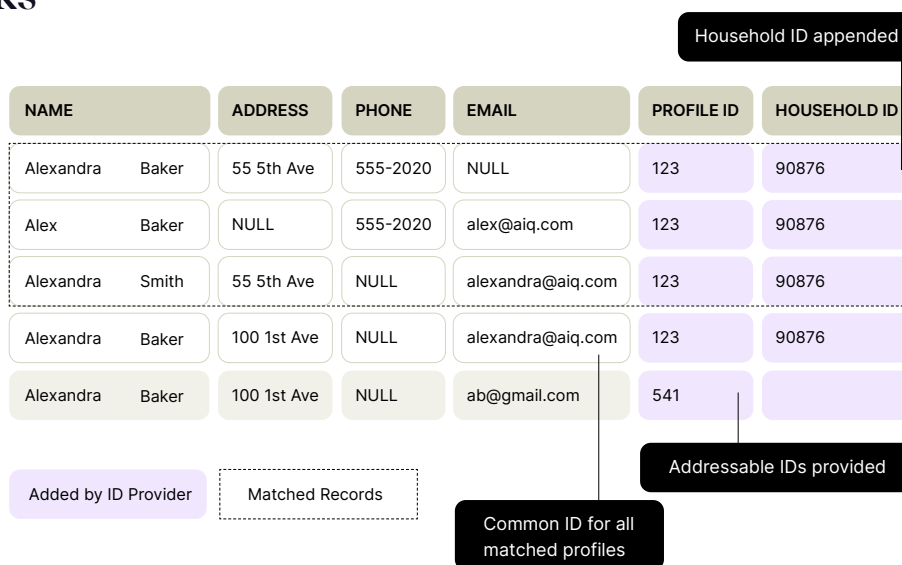

Integrate any anonymous and known ID graph with your first party data, respecting privacy regulations, to create an addressable portfolio of IDs.

### Addressability

Access a broad network of advertising channels (DSP, Walled Gardens, etc) to reach your customers.

## How It Works

## Partner Ecosystem

neustar

MERKURY

ACXIOM

data axle

# IdentityEdge

Obtain addressable signals among traffic from your digital properties and retarget in real time using integrations with demand-side platforms, walled gardens and other vendors.

## What You Get

### Retargeting

Achieve retargeting on paid media channels without relying on third party cookies.

### Cost Saving

Reduce dependency of expensive data onboards.

### Improved Operations

Leverage seamless integrations built and maintained for you via direct relationships with paid media vendors.

## How We Do It

### ActionIQ Tag

Deploy the AIQ Tag, natively integrated with ActionIQ platform, for a resolution within the first party domain, no third party cookie required.

### Edge ID Graph

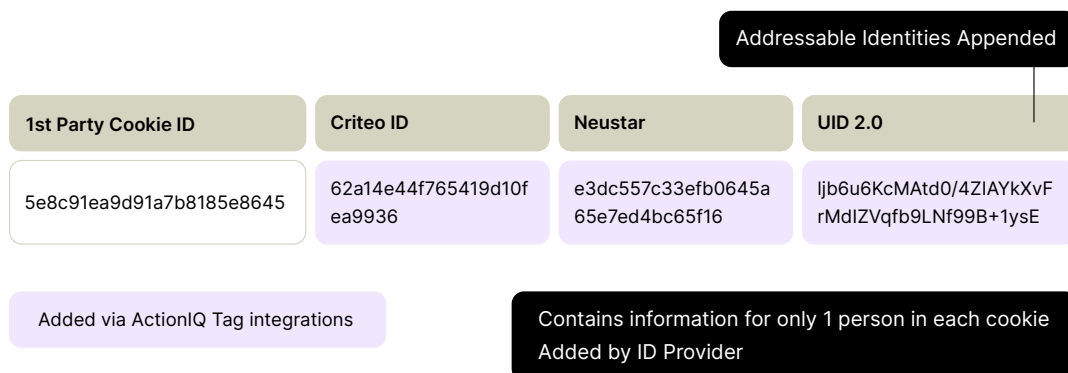

Collect accessible and addressable IDs, stored within the first party cookie. Sync user ID with walled gardens.

### Direct Integrations

Users of your web and mobile properties can be addressed on walled gardens, demand-side platforms and data and ID providers.

## How It Works

## Example

AIQ brings order to CX chaos. Our Customer Experience Hub empowers everyone to be a CX champion by giving business teams the freedom to explore and action on customer data while helping technical teams regain control of where data lives and how it's used.
